

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

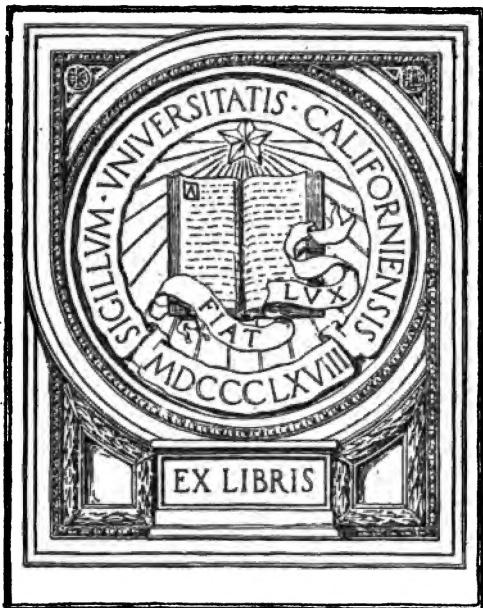

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

CITY OF BOSTON.

OFFICE OF THE AUDITOR OF ACCOUNTS,
City Hall, June 1, 1870.

TO THE HONORABLE CITY COUNCIL:

Gentlemen : — The undersigned, Auditor of Accounts, in conformity to the fifteenth section of the Ordinance on Finance, has the honor of presenting to the City Council his Annual Report of the Receipts and Expenditures of the CITY OF BOSTON and the COUNTY OF SUFFOLK, for the financial year commencing May 1, 1869, and terminating April 30, 1870, both inclusive, appropriately arranged and classified, which is the Fifty-Eighth of the series.

During the past financial year the town of Dorchester has been annexed to the City of Boston in accordance with the requirements of an act of the Legislature of Massachusetts, approved June 4th, 1869, by a vote of the legal voters of said city and town on the 22d of the same month, as follows:—

Boston — Whole number of ballots,	3,985
For accepting said act,	3,420
For rejecting said act,	565
Dorchester — Whole number of ballots,	1,654
For accepting said act,	928
For rejecting said act,	726

In conformity to the act of annexation, the town of Dorchester forms the Sixteenth Ward of Boston, and the voters of which participated in the last municipal election and elected their ward officers for 1870. For the purpose of electing members of the House of Representatives, Dorchester remains a part of the county of Norfolk, constituting the Fifth Representative District thereof; to elect a Senator, a Councillor, part of the Second

Norfolk Senatorial District, and a Representative in Congress, part of Congressional District Number Two, as the same are now constituted. The jurisdiction of the courts of Suffolk County took effect on the first Monday of January last. All the interest which the town of Dorchester had in the public property of the County of Norfolk was released to the County of Norfolk. Such proportion of the debts and obligations of that county, over and above the value of all the property belonging to the county, as should proportionally and equitably be paid by the inhabitants and property-owners of the territory annexed to Boston, must be paid by the City of Boston to the County of Norfolk. The Supreme Judicial Court is given jurisdiction in equity to determine the amount of such proportion and enforce the payment of the same upon a suit in equity, in the name of Norfolk County, to be brought therefor within six months after this act shall go into operation, by the County Commissioners; but no such suit can be instituted after six months from that time.

The debt of the town of Dorchester assumed by the city of Boston was \$366,200, of which \$152,700 has been paid since annexation. Boston has added by this annexation to its territorial proportions 4,533 acres, making the area of the metropolis 9,987 acres. The valuation of Dorchester, at the time of annexation, was \$12,826,200 in real estate, and \$7,489,500 in personal estate. The population was about 12,000. The present population of Boston is estimated at 285,000. The following shows the present area of Boston:—

Original area of upland in Boston proper,	690 acres.
Area added and in progress by filling flats,	880 "
Area of South Boston,	900 "
Area of East Boston,	800 "
Area of Roxbury,	2,184 "
Area of Dorchester,	4,533 "
 Total area of Boston,	 9,987 "

AUDITOR'S REPORT.

7

The valuation of the city by the respective Boards of Assessors for 1869 of the City of Boston and the Town of Dorchester was:—

Boston:

Real Estate,	\$332,051,900
Personal Estate,	217,459,700
Total,	\$549,511,600

Dorchester:

Real Estate,	\$12,826,200

THE DEBT OF THE CITY.

The City Council of last year, at the recommendation of the Committee on Finance, by an order passed June 1, 1869, authorized a "Consolidated Street Improvement Loan" of not exceeding \$5,000,000, which will embrace the Fort Hill Improvement, Atlantic avenue, widening of Hanover street, and the Church street District Loans, and said Committee voted that said loan should be a sterling one, and passed a vote on the 20th of September, 1869, requesting the Treasurer to visit London and such other places in Europe as he might deem expedient for the purpose of carrying out the negotiations for the loan. In accordance with this request of the Committee on Finance, Mr.

Tracy, the City Treasurer, visited Europe, leaving this country on the 20th of October, 1869, and returning to this city on the 18th of February, 1870.

During his absence, in the month of January of this year, he negotiated with the Messrs. Baring Bros. & Co. of London, by subscription, a sterling loan of £800,000, at 87 per cent on the following conditions and terms, viz: "The loan to be placed upon the market for subscription at 87 per cent, 600 bonds of £500 each, and 5000 bonds of £100 each; payable 10% on allotment; 25% on April 6; 25% on May 20; 27% on June 20. That £8,000 per annum should be applied from the Sinking Fund annually to the redemption of the bonds to be purchased at the market rate. The charge to be as follows: one per cent on the gross amount of each payment of the subscription; one quarter of one per cent brokerage on the nominal value; one eighth of one per cent stamp duty on the nominal value exacted by the Government on all bonds issued in sterling; one per cent on the payment of interest; one-half of one per cent on the purchase of bonds for the Sinking Fund; one per cent on the payment of the principal when due; no charges to be made on drafts or for the purchase of gold, excepting what might be paid for insurance, freight, postage, etc.; interest to be allowed on all balances in their hands at the Bank rate, not exceeding five per cent."

The Water Loans outstanding April 30, 1870, amount to only \$5,731,711.11; but the real debt of the Water Works is shown by the excess of the expenditures for said works over the revenue derived from the same, which is, as stated above, \$9,765,959.87.

NEW PUBLIC BUILDINGS.

SHURTLEFF GRAMMAR SCHOOL-HOUSE.—This house, commenced in the autumn of 1868, was completed and dedicated in November, 1869. It is located in ward 12, on Dorchester Street, between Seventh and Eighth streets. The lot is the largest in the city, containing 41,000 feet. The building has four elegant and ornate façades, with central projections in each of the same, with all their windows and doorways elaborately finished with stone and brick dressings, and is in the form of a Latin cross, having an extreme width of $104\frac{8}{12}$ feet, and an extreme length of $114\frac{1}{2}$ feet. It is three stories in height above the basement, the third story being within the Mansard roof, which crowns the whole area of the structure. The basement contains the play-rooms, fuel and furnace rooms, teachers' water-closets and janitor's room, together with halls and staircases communicating with the rooms above, and is provided with entrances from the yards and play-grounds. The first and second stories each contain six school-rooms, 29×32 feet square and $13\frac{1}{2}$ feet high, in the clear, six clothes-rooms and four teachers' rooms, opening into a hall 24 feet wide, extending the whole length of the building. The third or roof story contains an exhibition hall, $54\times 75\frac{1}{2}$ feet, with two anterooms attached; two school-rooms, 27×30 feet; teachers' rooms, clothes closets, committee rooms, etc. Each school-room is provided with fifty-six desks and chairs, and the fourteen rooms will together accommodate seven hundred and eighty-four scholars. Externally the structure exhibits two stories, elevated on a high basement or stylobate, the whole being crowned with one of the most noble Louvre roofs yet introduced upon any public building in our city. The great height of this roof and the area which it covers has enabled the architects to place in it the exhibition hall, two school-rooms, two large anterooms and numerous other conveniences, and at the same time avoid the necessity of con-

structing the exterior walls for a third story, thereby saving a large expense. The building is thoroughly ventilated by venti-ducts, extending from each room to a large monitor sky-light in the centre of the roof. It is warmed by George W. Walker & Co.'s Indirect Steam Heating Apparatus, which is successful in all respects. Great credit is due Gridley J. F. Bryant and Louis P. Rogers, the designers and architects, for the success of the plan. The contractors were Wm. Sayward, for masonry; Benjamin H. Flanders, carpentry; Lawrence Cleary, plastering; George W. Sprague, painting; C. S. Parker & Sons, roofing and copper work; Geo. W. Walker & Co., heating; and Joseph L. Ross, furniture. Cost of building and furniture, \$108,526.45.

RICE GRAMMAR SCHOOL-HOUSE. — This building was erected on the corner of Dartmouth and Appleton streets, of face bricks with Caledonia stone trimmings; it is two stories in height besides the basement and French-roof story, has three entrances, one in each of the two towers which flank the main building on Dartmouth street, and one in the wing on Appleton street. The house contains 16 school-rooms, each with a clothes-room and teacher's closet, an exhibition hall 57×76 feet, two large dressing-rooms for the teachers on the first floor, a committee and master's room on the second floor, and store, book, and apparatus room on the third floor. Three flights of stairs lead from the first to the second floor, two of these continuing up to the third floor; the corridors are 15 feet wide, running the entire length of the building, and terminating at either end in the form of an octagon, 25 feet in diameter, from which some of the rooms are entered. The basement contains play-rooms, boiler and fuel-rooms, and a janitor's room. The building is heated by steam, and the system of ventilation has proved very satisfactory. The lot is enclosed with an iron fence on three sides, and with a brick fence on the remaining fourth side. The plans and specifications for this building were drawn by Emerson & Fehmer, architects, of this city. Con-

tractors, A. Lothrop and S. J. & G. Tuttle, masons; carpenter, E. B. Witherspoon; plasterer, L. Cleary; painter, C. E. Noyes; furniture, W. G. Shattuck. Cost of building and furniture, \$107,476.77.

PRIMARY SCHOOL-HOUSE ON APPLETON STREET.—This house was erected on a lot of land on Appleton street adjoining the Rice School-House, of the same kind of materials and in corresponding style of architecture. It is nearly square in form, the front only being broken by a tower which contains the entrance and one of the flights of stairs, the other flight being at the opposite end of the corridor, which is 15 feet wide. The house contains 10 school-rooms, each with a clothes-room and teachers' closet, an exhibition hall, 32×70 feet; and play-rooms, teachers' dressing-room, and boiler and fuel-rooms in the basement. The building is also heated by steam and well ventilated. The plans and specifications were drawn by the architects of the Rice School-House, Emerson & Fehmer. Contractors, S. J. & G. Tuttle, masons; W. & J. Rawson, carpenters; G. W. Walker & Co., Heating Apparatus; J. L. Ross, furniture. Cost of building and furniture, \$60,212.13.

DRAKE PRIMARY SCHOOL-HOUSE, CORNER OF C AND THIRD STREETS, SOUTH BOSTON.—This building is in outline a parallelogram, 30×76 feet, is three stories high, with a hip roof and pediment front, and is built of brick with freestone trimmings. The basement contains heating apparatus and fuel-rooms, and two large play-rooms; large stairways lead to the first story and yard. Each story contains two school-rooms, entry, staircase, hall, and two large wardrobes for the pupils. The school-rooms are 28 feet square, 12 feet high, and will each seat 56 pupils. The lot contains 10,260 feet of land; the area outside the building is paved and surrounded by a substantial iron fence. The building was named after the late H. A. Drake, Chairman of the District Committee. The contractors were W. & J.

Rawson, for carpentry; S. J. & G. Tuttle, for masonry; and Gardner Chilson for heating apparatus. Architects, G. J. F. Bryant and L. P. Rogers. Cost of land, building and furniture, \$41,872.94.

WARD ROOM, WARD 9, AND HOSE HOUSE No. 8, ON CHURCH STREET. — This is a brick building with granite trimmings, of irregular form, 52 feet front, 44 feet back, 67 feet on longest side, and 54½ feet on the shortest side. It is two finished stories in height; the first story is 12 feet and the second 10 feet high, in the clear. The cellar under the whole building is 8 feet high in the clear. The second story does not cover the whole of the first, but extends back, from Church street, 37½ feet. The principal story contains a ward-room, a room for the hose-carriage, stable, hose-tower, water-closet, etc., and a space in the centre is occupied by the stairs leading to the upper story. A partition separates the hose-room from the ward-room, the latter being a large and commodious room, affording ample accommodations for the citizens of Ward 9. The second story is fitted up as a tenement for the driver of the hose carriage and also a room for the meetings of the company. The contractors were Morrison & Shaw for carpentry, and Edwin Adams for masonry. Architects, G. J. F. Bryant and L. P. Rogers. Cost of land, \$10,532.50; of building, \$21,799.58. Total, \$32,332.08.

ENGINE HOUSE No. 7, AND HOSE HOUSE No. 2. — Is on East street, built of face brick with freestone trimmings. It contains two finished stories, a basement, and a French roof story. The basement is 7 feet high, the first story 13 feet, and the second story 9½ feet high in the clear. The first story contains an engine and hose-room, stable, harness room, wash room, etc. The second story contains sleeping rooms, parlor, bath-rooms and hay loft, and a repair shop. The contractors were Keyes & Kelley. Architects, G. J. F. Bryant and L. P. Rogers. Cost of land and building to date, \$23,797.43.

Hose House No. 3.—This building, on North Grove street, is in outline a parallelogram, 50 feet long and 22 feet wide. It is two stories high, built of brick with granite trimmings. The first story is 11 feet high in the clear, and contains a carriage room, stable, wash-rooms, etc. The second story is $9\frac{1}{2}$ feet high in the clear, and contains a large room for the meetings of the company, two sleeping rooms, bath-room, etc. The attic is used as a store-room. The contractors for the building were Weston & Shepard. Architects, G. J. F. Bryant and L. P. Rogers. Cost, \$13,556.51.

POLICE STATION No. 6, BROADWAY, SOUTH BOSTON.—The front part of the building was torn down, and rebuilt of brick with granite trimmings, and a basement and French roof story added. The basement is 7 feet high and contains a furnace-room, furnace which heats the whole house, fuel-rooms, etc. The first story is 12 feet high, and contains a general office, captain's private office, guard-room, kitchen, drying-room, wash-room, etc., and in the rear are the cells, 12 in number. The second story is 10 feet high, and contains rooms for the lieutenants and sergeants, and sleeping rooms for the patrolmen. The third, or French roof story, is 9 feet high and contains sleeping-rooms, duplicates of those in the second story. The re-building of this house was one of the most necessary as well as one of the most economical improvements made upon any public building during the year, and great credit is due to the architects for the fine exterior as well as the general excellence of the interior arrangements. The contractors were Baxter & Vinal; architects, G. J. F. Bryant and L. P. Rogers. Cost, \$12,980.82.

HOOK AND LADDER House No. 5.—This is a two-story building situated on Fourth street, South Boston, built of brick with granite trimmings. The main cornice and balustrade surmounting it are of wood, and the roof is flat and covered with composition. The first story is $13\frac{1}{2}$ feet high, and contains a room for the

Hook and Ladder carriage, 23×64 feet, and a stable 22×17 feet, with stalls for four horses. The second story is 12 feet high, and contains a hall for the meetings of the company, and a tenement for the driver. A portion of the building in the angle, between the main building and the stable, is finished one story high, and contains coal bins and a fuel wagon. The lot contains 3,727 square feet. The house was built by Wm. Sayward, from plans and specifications prepared by G. J. F. Bryant and L. P. Rogers. Cost, \$15,983.80.

These buildings were erected under the direction of the Committee on Public Buildings of the City Council, and the general superintendence of James C. Tucker, Superintendent of Public Buildings.

STREET WIDENINGS, EXTENSIONS, ETC.

The most important street widenings and extensions, authorized during the past fiscal year, are as follows, viz:—

CITY PROPER.—The widening of Hanover street, between Blackstone and Commercial streets, to sixty feet, at an estimated expense of \$545,052; the widening of Eliot street to fifty feet, between Washington and Pleasant streets, at an estimated expense of \$341,779.50; and the laying out, widening and grading of the following streets on Fort Hill: Hamilton, Sturgis, Hartford, High, Purchase, Wendell, Washington avenue, Washington square, Pearl place, Broad street at junction with Atlantic avenue, at an estimated expense of \$908,327.02; the widening of Federal street between High and Purchase streets, at an estimated expense of \$27,811; the widening of Summer and High streets at their junction, at an estimated expense of \$13,581; the laying out of Columbus avenue from Northampton to Ferdinand streets, at no expense; the widening of Bedford street at the corner of Washington street, at an estimated expense of \$15,980: the laying out of West Chester avenue, West Springfield

street, Pembroke street, Worcester street, West Canton street, West Newton street, West Concord street, Rutland street, Yarmouth street, and Holyoke street, west of Columbus avenue, at no expense; the laying out of Ferdinand street at no expense, and the widening of Washington street between Indiana place and Castle street, at an estimated expense of \$8,500.

SOUTH BOSTON.—The laying out and extension of Woodward street from Dorchester to Federal street, at an estimated expense of \$2,248; the laying out and extension of Ontario and Colony streets, at an estimated expense of \$1,600, and the laying out of Fifth street from G to H street, at no expense.

BOSTON HIGHLANDS.—The extension of Vernon street from Cabot to Tremont street, at an estimated expense of \$7,092; the laying out of Rockville place, at no expense; the laying out and extension of Copeland street, at an estimated expense of \$2,384; the laying out of Highland avenue, Linwood street, Prentiss street, Halleck street, Mindoro street, Windsor street and Weston street, at no expense; the laying out of Lamartine street, at an expense of \$13,148.25; the extension of Zeigler street from Warren street to Guild row, at an estimated expense of \$18,435.50; the widening of Warren street between Cliff and Dudley streets, at an estimated expense of \$2,000.

The total of the above street improvements amounts to \$1,919,713.27. Several other streets have been laid out, widened and extended, during the past year, of less importance than those above enumerated, the estimated cost of which is \$10,592.40; making a total for the fiscal year, for all these improvements, of \$1,930,305.67. No betterments have yet been assessed in consequence of the above improvements, as those of the above-named streets are not yet completed where betterments will be assessed. The following betterments have been assessed, however, during the past fiscal year, on streets which were widened or laid out prior to May 1st, 1869:—

Devonshire street,	\$285,275	37
Oliver street,	182,998	90
Federal street,	70,978	35
Tremont street,	214,623	10
<hr/>		
Total,	\$708,875	72
<hr/>		

In relation to the preceding statements, that certain streets were laid out at no expense, it should be remarked that the laying out was at no expense to the city as far as the land taken for those streets are concerned, but that the cost of filling, grading, and paving of them is borne by the city, which forms a considerable item of expense.

FORT HILL IMPROVEMENT AND ATLANTIC AVENUE.—The work of grading Fort Hill has been well advanced during the past year. A portion of the buildings on the easterly side of the hill has been demolished and removed, and the contractor has removed to Atlantic avenue a large amount of earth from this portion of the hill.

Atlantic avenue is nearly completed, and the city has commenced filling the docks lying west of that avenue, under authority of a special Act of the Legislature. It is expected that the entire work of grading Fort Hill, and the filling of the docks west of Atlantic avenue, will be completed by another summer (1871); and the contractor is to complete Atlantic avenue (by the terms of his contract) by the 25th of August next.

BROADWAY EXTENSION.—The work of the extension of Broadway across "Fort Point" Channel to Albany street, was commenced in July of last year, a contract having been entered into with the Moseley Iron Building Works for constructing an iron bridge across the channel, piers, etc. The structures embraced in the contract with this company include everything except paving, between the easterly side of Foundry street in

South Boston, and the northwesterly side of Lehigh street in Boston proper, a distance of 1,117 feet, and they are progressing with the work. There are two stone abutments to the bridge structures,— one on the easterly side of Foundry street, and one on the northwesterly side of Lehigh street,— and retaining walls, on each side of the street from said abutments, to Federal street on the South Boston side, and to Albany street on the Boston proper side. Contractors for building the abutments, Clapp & Ballou; and they have completed their work. It is expected that this new highway will be opened to public travel this fall. A full description of the bridge and structures may be found in the City Engineer's Annual Report to the City Council, City Doc. No. 14, 1870.

CHURCH STREET DISTRICT.— The work of raising the grade of the "Church street District," which was commenced in July, 1868, as described in the last annual report, was completed in October, 1869, and the services of the commissioners appointed to superintend the work, terminated at the close of that year. All the buildings on the district were raised and underpinned in conformity to the plans furnished for the work. The sewer, gas and water pipes were relaid, and the streets repaved. The following streets, embraced in the district, were widened:—

Tremont street, westerly side,	widened 10 feet to 60 feet in width.			
Melrose street,	" 10 "	34	"	"
Winchester street,	" 11 "	37	"	"
Piedmont street,	" 10 "	28	"	"
Shawmut street,	" 26 "	40	"	"
Tennyson street, below Church street,	6 "	40	"	"
" " east of Church street, formerly Berlin street,	26 "	40	"	"

Columbus avenue was laid out from Ferdinand street to Church street, eighty feet wide. Two new Primary School-Houses are being erected within the district; one on the corner of Fayette and Church streets, and the other on Tennyson street. Also, a

ward-room and hose house has been erected on the corner of Church and Fayette streets.

There have been raised upon the district, 296 brick buildings, varying in height from 10 inches to 14 feet. Of this number, 28 have been moved back to widen streets: 74 were moved 10 feet; and 8, 25 feet and 6 inches. There have been 56 wooden buildings raised, independent of ells and sheds, varying in height from 1 foot to 17 feet. 6 of this number were moved back, for the purpose of widening streets, from 3 to 25 feet. 37 wooden buildings, independent of ells and sheds, and 30 brick buildings, have been demolished, mainly for the purpose of widening streets.

The total cost of the work to April 30, 1870, including the land purchased for the school-houses, ward-rooms and hose-house, and widening the streets named, was \$1,083,095.91; paid into the Treasury for estates purchased by the city, and subsequently sold, old materials, etc., \$116,673.45. The cost of land taken for streets, school-houses, ward-room and hose-house, not originally estimated for, is divided as follows:—

PUBLIC WORKS.

CHESTNUT HILL RESERVOIR.— There has been no diminution of the energy with which the work upon this reservoir has been prosecuted during the past year. The amount of embankment built and surplus material removed, exceeds any previous year's work. 120,000 cubic yards of gravel have been removed from the lower basin and used in constructing the embankments at the effluent and intermediate gate houses. 68,000 cubic yards of loam, quicksand, etc., have been removed from this basin and deposited in spoil banks, or used in filling the "Dowse Meadow" and loaming the embankments. 35,000 cubic yards of rock have been removed from the lower basin and used in building slope wall, foundation of effluent gate house, brace wall to driveway retaining wall, ballasting the driveway at intermediate gate house and the walks upon the reservoir embankments. The smaller stone have been broken by the stone crusher into sizes suitable for road materials and used in surfacing the driveway and paths, previous to graveling. The upper basin has been filled with water and is now in use in connection with the Brookline reservoir in supplying the city when the water is shut off at the lake. The dam at the intermediate gate house is for all practical purposes water-tight, the leakage being so small that the height of water is not perceptibly affected by it when the reservoir is disconnected from the Lake and Brookline reservoir. The foundation of the effluent gate house was completed on the 11th of August, and on the 12th the first stone of the lower floor was laid, and the gate house was ready for the superstructure on the 1st of December. On the 9th of April work was resumed on this building and the masonry will be completed in readiness for the roof by the 1st of July. Some idea of the amount of labor involved in the construction of this building may be gained from the quantities of masonry. In the foun-

dations and wing walls there are 4,578 perches of rubble masonry. If this amount was built in the form of a wall 4 feet in height, and 1½ feet in thickness it would extend a distance of 3½ miles. 1,800,000 bricks have been laid in this building, and the appurtenances to it. If they were built into a similar wall it would extend about 2½ miles. The two would form a wall of this section which would more than reach from this gate house to the City Hall. There are 950 cut stones in this building varying in weight from 10 tons to 100 pounds, and this number does not include the stone ashler in the superstructure. The larger portion of this building is not in sight, being enclosed by the embankment, and it is difficult to realize from a superficial inspection that there could be any such amount of labor in constructing it. The driveway which extends around this reservoir is now nearly completed, and as soon as the gateway is finished it will be opened its entire length for driving. This driveway is already a place of great resort, and will be the most beautiful drive in the vicinity of Boston when completed and the reservoir is filled with water. No drainage from the roadway can enter the reservoir to contaminate the water, as it is all intercepted by a system of drain pipes which conduct it beyond the reservoir limits. The gateway which is now being built is a very beautiful structure of Concord granite with a main and two side entrances; the main entrance is 23 feet wide, and the side entrances each 11 feet. From the roadway to the top of the urn which forms the apex of the gateway, is 56 feet 2 inches, and the arch which spans the main entrance is 29 feet in height, measuring from the roadway. The line of 48-inch main pipe from this reservoir to connect with the three pipes from the Brookline reservoir has been completed by laying 633 feet of pipe, and putting in the stopcocks at the Brookline reservoir and at the connection on Boylston street. The average force employed on the work during the past year was 451 men, 79 teams (each team 2 horses and carts, and driver),

and 20 yoke of oxen. Cost of the reservoir to April 30, 1870, \$2,093,814.15; of the driveway, \$144,720.25.

EAST BOSTON RESERVOIR. — The work of repairs on this reservoir was fully completed and water let in on the first of August last. It has since been very thoroughly tested by filling it to various heights up to its full capacity, and, as yet, no sign of leakage from the reservoir has been discovered. The work of building a new iron fence on the street fronts of the reservoir awaits the action of the Paving Department in grading the streets. The iron work is all ready. Since January 1st, 1870, East Boston has been supplied with Mystic pond water by the Charlestown Water Works. This relieves the Cochituate works to the extent of about 1,000,000 gallons per day, and gives to East Boston an increased effective head for ordinary use of from ten to twelve feet, and, in case of an extraordinary demand, a still further increase of twenty feet can be obtained.

EXTENSION OF THE WATER WORKS IN BOSTON HIGHLANDS. — The work in this section has been prosecuted by the superintendent with his customary vigor; but the failure to receive the castings promptly, the extremely hard character of the excavations, and the fact that the gangs were unavoidably shifted from one locality to a far distant one before completing all the work in the first locality, will be a sufficient excuse for any seemingly apparent shortcomings. The following statement, however, shows just what was accomplished:—

During the past year the high service works, pumping engines, engine house and stand-pipe have been completed and are now in operation. The districts now supplied are the ones described in last year's report as the "Highland" and the "Tommy's Rocks," or "Mt. Warren." The amount consumed in these districts is very small as compared with the capacity of the pumps. In March, 1870,—the first month the engines run,—the average pumping time was one hour and forty minutes per day, and the average consumption per day was about 47,000 gallons. In April the result was about the same, and for the first five days of May the consumption had increased to nearly 85,000 gallons per day, and the pumping time to two hours and forty-two minutes. The pipes will be still further extended in the high service sections the present year, and the Beacon Hill high district will be connected and the engines will have work enough to run economically. (The connection for the supply of Beacon Hill high district, a description of the manner making it which follows, was made June 11, and the people of that district, much to their gratification, have now a full supply on every floor of their houses.)

BEACON HILL HIGH SERVICE.—The City Engineer, in his report to the Water Board for 1868, suggested as a proper and

effectual means of supplying this district, an independent system of pumping works similar to those adopted for the Roxbury high service. Since then, however, by request of the Water Board, he has made surveys and given the whole subject a more thorough examination. The area now supplied by the thirty-inch pipe through the Beacon Hill Reservoir is $136 \frac{32}{100}$ acres, including streets; the area of the district to be supplied by pumping is $47 \frac{65}{100}$ acres, of which $16 \frac{21}{100}$ are streets and public grounds. There are on this area, 636 dwelling houses, 3 hotels, 3 stables (101 horses), 2 school-houses, 3 churches, State House and Athenæum. The number of inhabitants is estimated at about 6,000, and upon this basis the requirements for domestic uses will be about 240,000 gallons per day; the consumption by the hotels, however, is not so easily estimated as for ordinary domestic uses, and probably the amount required, especially if the Revere House be included, will be considerably larger. The plan devised by the Superintendent, Mr. Jones, and the City Engineer, Mr. Crafts, after a very thorough investigation of the whole subject, was to supply this district from the Roxbury pumping works, as it was found that the capacity of the pumps was ample for several years, and that, by means of the existing mains, and the expenditure of a few thousand dollars, the work could be successfully accomplished. The plan is briefly as follows: By means of a gate or stop-cock to cut off the present supply to Beacon Hill through the thirty-inch main at a point near the pumping works in Roxbury, thus diverting the water which now goes to Beacon Hill into the pipe which now supplies the Highland district,— both high and low service. The water for the high service is then passed through the pumps to the stand-pipe, and thence is returned to the thirty-inch pipe, below the gate above referred to, and thence on to Beacon Hill. The thirty-inch pipe being a continuous pipe without branches or connections, is thus made to answer all the requirements of a special main from a point near the pumping

works to Beacon Hill, while at the same time it furnishes from Brookline reservoir all the water required for the Roxbury high and low service, and for Beacon Hill too. The Beacon Hill reservoir will be of no use to the high service when the pumps are in operation, as the head from the stand-pipe will be one hundred feet above the top water line as now maintained. The engines are each of a warranted capacity to deliver 1,500 gallons per minute at an elevation of 235 feet above "tide marsh level," and it is estimated that the total high service requirements, including Beacon Hill, will not, for the next ten years, amount to more than 700 gallons per minute, or less than half the capacity of each pump.

DARTMOUTH STREET BRIDGE.—In the early part of last year a wooden trussed bridge was built over the Boston and Albany railroad and Boston and Providence railroad tracks at Dartmouth street. The two main trusses, which are built continuous over the piers, are respectively two hundred and twenty and one hundred and ninety-eight feet long, and of the style known as the "Pratt Truss." The sidewalk trusses rest on the same piers as the main trusses; but as the piers are necessarily at an angle oblique to the axis of the bridge, the lengths of the spans vary. They are continuous over piers. The floor timbers are 4 by 14 inches, placed two in each bay or panel; every other one is double and trussed with a truss-rod one and one-fourth inch diameter, the struts being continuous 12 by 12 inch timbers running the whole length of the bridge. The roadway floor is double, the lower one being of 4-inch spruce, and the upper one 2-inch white oak, laid crosswise the bridge. The sidewalk floor is of two thicknesses of 2-inch spruce plank. The trusses are covered with a wooden coping, and all the wood-work and ironwork exposed, was painted three coats and sanded. All the woodwork was creosoted or burnetized. Contractor, Joseph Ross, of Ipswich. Cost, \$26,780.

DORCHESTER STREET BRIDGE OVER OLD COLONY AND NEWPORT R. R. TRACK.—The bridge over the Old Colony and Newport railroad at Dorchester street was originally built, and has since been maintained, by the Railroad Company. In order to complete the widening of the street, it was necessary to enlarge this bridge, extend the abutments, and build new retaining walls. So far as the alteration of the bridge and abutments was concerned, the city was powerless to act without the consent of the Railroad Company. Therefore an agreement was concluded between said company and the city, by which the city was to do all the work required, and assume the care and maintenance of the bridge and abutments ever after, the Railroad Company paying four-fifths of the cost. The old bridge was a wooden one, and could not be economically widened, and a structure, mainly of iron, was built. The width of the street, as widened, is 50 feet, and the clear span of the bridge 27 feet. Contractors for building the bridge, the Atlantic works; for the masonry, grading and filling, Clapp & Ballou. All the work under both contracts has been done, and the cost of the bridge work was \$3,000.00, and of the mason work, grading and filling, \$8,250.00.

DEER ISLAND IMPROVEMENTS.

Three new buildings were erected at Deer Island during the past year. The first in importance is the building which was originally designed for the pauper girls. Upon its completion, however, as the number of boys was greatly in excess of that of the girls, it was thought best by the Board of Directors to transfer the boys to the new building, and place the girls in the building which had been fitted up for, and occupied by the boys. The other two buildings are a house for the farmer, and a shed for housing the carts and farming utensils, and for curing and packing onions, the raising of which has come to be very suc-

cessful and profitable, as over 1,500 barrels were sold from last year's crop.

THE BUILDING FOR PAUPER BOYS.—The building occupied by the pauper boys, although nominally a two-story building, has four finished stories, and a cellar. The main building is 78 feet long by 41 feet wide. From the centre of the easterly end projects a staircase 15 feet square, which connects with a boiler house 32 feet by 41 feet; on the easterly side of which is a corridor 20 feet long by 8 feet wide, connecting with the building occupied by the pauper girls, making the whole length of the new building 143 feet. The lot on which the group stands lies between two streets with a difference in level between them of about 16 feet; the ground sloping gradually from the higher down to the lower street, and from the westerly towards the easterly end of the group. The principal or entrance front is on the high street. The first or principal floor of the main building is about 6 feet above the ground at the westerly end, and is approached by a flight of stone steps and an entrance near each end of the building. At the easterly end the basement story is entered through the corridor from the upper side on a level with the ground, while on the lower side the ground is on a level with the boiler-room, which is on a level with the cellar floor, so there are entrances to the cellar, basement and first story above the ground outside of the buildings. On the upper side the main building shows two full stories in height and a French roof or attic story; on the lower side three full stories and attic. The boiler-house is one story high on the upper side and two stories high on the lower side, with a hipped roof. The basement, first, second and attic stories are finished; the basement 10 feet high, the first, second and attic stories each 12 feet high. The cellar under the main building is 7 feet high. The lower story or cellar of the boiler-house is 9 feet high. The arrangement of the first or principal story, commencing at the westerly end of the main building, is

an entrance with a vestibule opening into a hall 12 feet wide and extending across the full width of the building. A staircase communicates with the upper stories and with the basement. In this hall the boys deposit their hats before passing into the school-room, or up to the dormitories. From the hall two doorways lead to a school-room 28 feet by 38 feet, extending entirely across the building, and lighted on each side by three large windows fitted with inside blinds. Next adjoining this larger room is a smaller school-room 18 by 38 feet. The remaining portion of the story is appropriated to a parlor for the keeper's family, an entrance, vestibule, hall and large store closet. A door in the easterly end wall of the main building leads to the staircase before spoken of. The staircase at the easterly end leads up to a passage in the centre of the main building, on either side of which is a room 15 feet square. One is a matron's room, the other a bed-room for the keeper's family. Beyond these two rooms and at the end of the passage, is a dormitory for the boys, 38 feet wide by 47 feet long, occupying the whole space over the school-rooms, and lighted by five windows on each side. The staircase at the westerly end occupies the middle portion of the end of the building, on either side of which is a small bed-room. In the attic story at the westerly end, is the teacher's room and a store-room for clothing and bedding. The space over the large dormitory in the second story, is divided into two rooms corresponding in width with the school-rooms in the first story; the larger room is used as a dormitory, the smaller room as a hospital. At the easterly end, over the keeper's rooms, are two rooms, one for the nurse, the other for an additional bed-room. Descending to the basement story, at the westerly end is an entry with a door leading to the yard and play-ground in the rear, and with a flight of stairs leading down to the cellar under the main building, which is used as a play-room in stormy weather. The entry opens

into the staircase hall, which communicates with the stories above and with a bath-room and lavatory, under the large school-room, 16 feet by 28 feet, which is fitted up with seven iron bath tubs, supplied with hot and cold water, and a wash-sink 24 feet long, back of which are the towel racks. The remaining space under the school-room is used as a play-room at present, though designed for an additional dining-room whenever it may be required for that purpose. Under the smaller school-room is the boys' dining-room, 18 feet by 38 feet, extending across the building and lighted from both sides. Opening from the dining-room is a large dish closet, back of which and in the front corner of the building, is a large store-room. In the opposite rear corner is the officers' dining room, fifteen feet square. A passage in the centre of the building leads from the boys' dining-room, through the easterly staircase, boiler-house and corridor, to the building occupied by the girls, the first floor of which is on the same level as the basement floor of the new buildings. At the westerly end of the girls' building is the kitchen, in which, at present, is done the cooking for both branches of the establishment, although the upper floor of the boiler-house, which is on a level with the basement floor of the new building, is designed eventually to be used as a kitchen and laundry for both houses. On the lower floor of the boiler-house, on the side of the lower street, is the boiler-room, in which are two steam boilers, from which both buildings are warmed throughout. On the front or higher side is a large coal cellar into which the coals are dumped from the level of the ground above. On the lower floor of the boiler-house, in one corner, are the house servants' privies, over which, on the upper floor, are the officers' privies, in all of which have been placed the "Dry-Earth Closets," which have thus far proved very satisfactory, as they obviate the foul smells which proceed from the ordinary vaults.

The inequality in the surface of the ground around the build-

ings before alluded to, has been taken advantage of, and has conducted greatly in rendering the varied accommodations and requirements convenient and easy of access. The whole has been planned with a view to rendering the Institution as home-like and comfortable as possible without incurring the charge of extravagant and useless expenditure. Particular care was bestowed upon the arrangement of the principal rooms to be occupied by the children, that they should be light, airy, and well-ventilated, with plenty of sunlight in the dormitories and hospital. The principal school-room is not surpassed by any in the city for lightness, airiness, and ventilation. The finish of the rooms, as also of the whole building, is of hard and white pine, varnished directly on to the wood. The doors, and portions of the finish around the doors, and the blinds to the windows, are of white pine; the wall lining and front finish around the doors and windows, is of yellow southern pine; the jambs of the doors are of white and yellow pine, mixed; the effect of which, in conjunction with the white pine doors and yellow pine finish and wall lining, is very beautiful, as well as neat and tidy. The varnish brings out beauties which are too often covered with paint and coarse imitations of the beauties underneath.

The school-rooms, dormitories and hospital are warmed by hot and pure air, conveyed to the rooms through tin pipes leading from the steam apparatus located in the cellar. Each room has two registers for the admission of warm and pure air, and two ventiducts connecting with a ventilator cap on the roof, for the escape of the vitiated air. The smaller rooms at the ends of the building are warmed by direct radiation from the heating surface placed in the rooms, and ventilated by metallic ventilators set in the chimney flues.

The building is designed to accommodate one hundred boys, but provision has been made for an extension of the building at the westerly end whenever more accommodations are needed.

The external walls and principal partitions of the whole are

built of bricks. The underpinning is of split granite. A dressed granite belt at the height of the first floor marks the division between the upper and lower stories. The cornices are wholly of bricks with copper gutters. All of the roofs are slated with Virginia slates. All of the materials are first rate in quality, and the work has been done in the most thorough manner. And although the buildings are simple in their outlines, and not showy in external details, yet from their commanding position and good proportions they produce a very good effect when seen from the approaches to the Island and Institutions. A considerable portion of the labor in the erection of the buildings has been performed by the inmates of the Institutions, thereby saving a considerable expense to the city. The appropriation for the work was \$40,000. The buildings have been finished and furnished within the appropriation.

A thus full and detailed description of the buildings has been given because those whose sympathies are enlisted in behalf of soldiers' orphaned children as well as those of other unfortunates, have sometimes complained that such children are not properly housed and cared for, and that all having an interest in the matter may know that the city has made liberal provision for such, and that they are the objects of the tender care of the Directors for Public Institutions and of the Superintendent of the Institutions at the Island, and of those having the children directly under their care. The home now provided for these little unfortunates is *more* than comfortable, and is not surpassed, if it is equaled, by any similar institution in the country.

Cost of building and furniture, \$39,868.00.

THE FARMER'S HOUSE.—In the same range as the first described buildings, and located between the same streets, is the house built for the superintendent of the farming operations.

The principal front is on the higher street, and is one story high, with a French roof. The front on the lower street is two

stories high, with an entrance opening into the basement story. The main building is 35 feet by 40 feet. At the easterly end is a small addition in which are the privies, in which have been placed the "Dry-Earth Closets." In the basement story is a kitchen, work-room in connection with the dairy department, and a large milk cellar. To this department all of the milk is brought, and in it are performed all the operations of a quite extensive dairy, which supplies the milk, cream and butter for the various departments of the Institutions on the island. Under the basement story is a cellar for fuel, vegetables, etc.

In the first or principal story are four rooms, two on each side of the entrance hall, which are used as the living rooms for the farmer's family.

In the attic story is a bath room, and four nice square chambers for additional bed-rooms and for the house servants, who are supplied from the female portion of the inmates of the House of Industry. The external walls of the building are of bricks, with light-colored freestone caps and sills to the windows, and a stone belt course at the height of the first floor. The walls are covered by a neat bracketed cornice of wood with copper gutters. The roofs are slated throughout. Under the upper portion of the main roof and over the attic story is a loft or lumber room, in which is placed a large tank, from which water is distributed to the bath room, work-room, and boiler in connection with the kitchen range, which supplies the hot water for the dairy operations. All of the stories are provided with plenty of closet room and all the appurtenances thereto belonging. A dumb waiter connects the kitchen with the dining room over the kitchen.

The interior is finished in a neat and simple manner with white and hard pine. A portion of the work is painted and grained; another portion is painted in colors, and the hard pine work is varnished. All of the painting on this house, as also on the other buildings, has been done by inmates of the Institutions, and it has been done in a very creditable manner under the direction of the Superintendent of the Institutions on the Island.

The appropriation for this house was \$7,500.00, and it has been erected and finished with the amount appropriated. The result is a convenient and commodious house, in every way well adapted to the purpose for which it was designed, and an ornament to the island. Cost \$7,486.64.

THE FARM SHED.—The above named structure is built into the bank directly opposite and across the road from the large barn, and is 125 feet long, by 25 feet wide. The lower portion fronting on the road is used for housing carts, carriages and farming utensils. The back and ends of the lower portion are formed by a high bank wall built of granite blocks, upon which is built a wooden structure, the floor of which is on a level with the ground at the back of the shed. The floor of the upper portion is in one loft, the full length and width of the building, and is to be used for curing and packing onions, and for such other purposes as it may be required for. The cost of this structure was about \$5,000.00.

The buildings on Deer Island herein described were erected from plans prepared by George Ropes, architect; and the work executed under his general supervision and direction. Seth Perkins, the carpenter at the island, has had the local direction and supervision of the work. Tuttle, Paul & Co. furnished by contract the skilled labor for performing the mason's work. The laborers were provided from the House of Industry. Other contracts were made with Hawkins & Hawley, for the roofing on the building for pauper boys, and farm house, and with C. S. Parker & Son, on the farm shed; with Titus & Ripley, for the plastering; with Beal, Kendall & Co., for copper gutters; with A. B. & S. H. Loring, for the plumbing; with Hogan & Wetherbee, for stairs; with S. A. Stetson & Co., for gas pipes and fixtures; and with George W. Walker & Co., for steam heating apparatus, range, ventilators, etc.

DORCHESTER FIRE-ENGINE HOUSES.

The following are brief descriptions of the Steam Fire-Engine Houses erected by the town of Dorchester during the latter part of the year 1869, and completed at the time of annexation.

ENGINE HOUSE No. 16.— This house is located at the corner of River and Temple streets, at the Lower Mills. The building is a substantial brick edifice, 32 by 48 feet in the main part, with a wing 22 by 18 feet for a stable and hay loft; in the basement are located the hose tank, furnace, cistern, etc. The first story or engine room finishes 12 feet high and is sheathed throughout. The second story finishes 13 feet high, and is divided into a parlor 30 by 27 feet, one other large room, two capacious closets and a bath-room. The roof is pitched and slated, and the towers are handsomely capped and corniced. The building was constructed by F. M. Severance, carpenter.

ENGINE HOUSE No. 17.— This house, on Meeting House Hill, was enlarged and remodeled so as to furnish accommodations for men and horses. The size of the building on the ground plan is 55 by 39 feet. The basement, which is some 14 feet high, does not extend under the whole building, but is of size sufficient for a large cistern, a hose tank, cauldron, coal-bins, etc. Of the interior, on the first floor a space 27 by 15 feet is partitioned off for a stable. The remainder of the first floor is occupied for the engine and the hose carriage, except the space required by the hose tower, closet and stairway. The apartment finishes 12 feet in height, and is sheathed and ceiled with hard pine. Two capacious doors, 10 feet wide each, and lighted with plate glass of large size, open at the front. The second story is divided into a parlor 21 by 23 feet; two sleeping-rooms for firemen, 20½ by 17½, and 18 by 14½; a bath room, 8 by 10 feet; hay loft, 19 by 9½, and store room, 12 by 14, less the space occupied by the hose tower. The hose tower rises 50 feet from the ground floor, and the bell tower about the

same height. The building is surmounted by a French roof. Glidden & Richardson, contractors.

ENGINE HOUSE No. 18.—This house, located on Harvard street, is of brick, two stories in height, with a pitched roof. It differs from the others in exterior appearance in having the bell tower placed in the centre of the front, the hose tower being located at the side about two-thirds of the distance down. The bell tower rises to a height of 61 feet, and the hose tower to a height of 56 feet. The dimensions of the building are 63 by 28 feet. The basement contains a furnace, hose tank, hose trough fifty feet long, a cistern holding about 5,000 gallons, and other conveniences. The basement walls are of Roxbury stone, laid in cement. The first floor is divided into an engine-room 44 by 26, and a stable 16 by 26, with three stalls. Space is taken for the hose tower, which is of ample size, being 6 feet square, interior dimensions, and for a closet and harness-room. The floor, ceiling and sheathing of the walls of the engine-room are of hard pine, the height being 12 feet in the clear. A cornice of black walnut is extended around the room at the intersection of the walls and ceiling. The upper story is finished at a height of 11 feet. The parlor measures 16 by 25 feet. It is adorned with a cornice and centre piece in plaster, and is lighted in the front with two spacious double windows of plate glass. Two sleeping-rooms, $10\frac{1}{2}$ feet square each, and a bath room of the same size, containing bath-tub, basin and water-closet, are also on this floor. The hay loft, 25 by 16 in size, occupies the rear end. All the rooms but one are heated by furnace pipes, and are provided with closets for clothes, etc. The exterior front wall is of pressed brick, and the trimmings of the doors and windows are granite. The roof is slated and provided with copper gutters. Two wide double doors open upon the front, the spaces of the long upper panels being filled with plate glass. Plans by A. E. Richardson; contractor, F. M. Severance.

ENGINE HOUSE No. 19.—The plans for this house, which is located on Norfolk street, were made by Geo. F. Meacham. The building is of the Gothic style, the material being brick, with trimmings of unfinished granite. The first floor is divided into an engine room, 40 by 26½ feet, and stable, 12 by 26½ feet. The second floor is partitioned into a parlor, 23 by 26½; two sleeping rooms, each 17 by 11; bath-room, 9 by 6, and hay-loft, 12 by 26½. In the basement are placed the heating apparatus, cistern, etc. J. H. Burt & Co. were the builders.

ENGINE HOUSE No. 20.—This house is located on Walnut street, midway between the two adjacent villages of Neponset and Port Norfolk. The material is brick, with granite trimmings, and the construction is of the Italian order of architecture. The main building is 50 by 30 feet on the ground plan, but by adding the lateral projection of the towers an apparent width of 43 feet front and 53 feet length is obtained. The towers finish 9 feet square on the inside, the lower part of the bell tower giving space for a circular stairway to the second floor. In the hose tower the same interior dimensions are maintained, which gives abundant room for the manipulation of the hose. The hose trough is located on the first floor, and extends partly into the inclosure of the tower. The hose operations are therefore to be carried on at the front part of the building, not toward the rear as is usual. The engine room measures 32 by 27 feet, and the stable in the rear 15 by 27 feet. Three stalls and a harness closet are provided in the stable, and two large closets in the engine room. The heating apparatus is on the first floor, and a cistern of 5,000 gallons capacity is constructed upon piling beneath. This story is sheathed up five feet, and finished with plastering above. The second floor is divided into a parlor, 22 by 27; chamber, 13 by 20; bath room, 6 by 13; and hay-loft, 12 by 27. Both this and the Mattapan house have one wide entrance door at the

front centre, with smaller doors at the side, giving passage through the towers. The bell tower stands at the right of the main entrance, and rises to a height of 53 feet; the hose tower at the left is 64 feet high, and is surmounted by a flag-staff. The roof of the main building is pitched, but the towers have conical roofs, finished with bracketed cornices, finials and balustrade. Over the front door, and combined with it in forming a central architectural feature, is a large double, circular-headed window, with pilasters on each side, in the panels of which are representations of trumpets, suggestive of the purpose of the building. Contractor, E. A. Perkins, carpenter.

ENGINE HOUSE, No. 21.—This structure, situated on Boston street, near Upham's corner, was built under the supervision of R. T. Glidden, who did the carpenter work. The plans were drawn by A. E. Richardson. The building measures on the ground 68 by 23 feet, and its material is brick and granite in the lower stories, with a wooden, slated, mansard roof, within which are the parlor and chambers. The grade of the land affords a basement 12 feet in height, which is constructed with 16-inch brick walls. A large furnace, hose tank, fifty-foot hose trough of an improved pattern, a cauldron, and a cistern holding 100 hogsheads, comprise the principal accommodations of this story. The next floor, which corresponds to the grade of the street, is divided into an engine room, 47 by 26; engineer's work-room, 6 by 10 feet; water-closet and sink-room, 5 by 10 feet; one large and two small closets, and stable, 13 by 26 feet. The stable has three stalls, the woodwork of which is protected from the teeth of the horses by iron guards. The fixtures include also iron feed troughs and racks, and conduits for drainage. A rear stairway gives access to the hay-loft above. The hose tower rises from a point about two-thirds down the length of the building, passing through the roof about midway between the ridge and the gutter. Measured from the basement floor,

its height is 70 feet. The engine room is finished with hard pine sheathing four feet high, and with plaster above. A handsome cornice extends around next the ceiling, which finishes 14 feet in the clear. A broad stairway of easy slope, and furnished with a black walnut post and rail, ascends to the next floor. This floor is divided into a parlor, 27 by 20; engineer's sleeping-room, 20 by 12; fireman's room, 12 by 14; driver's room, 12 by 12; bath room, 8 by 12; and hay-loft, 13 by 26. Clothes closets are provided in each room, and a furnace register opens also into each. The parlor finishes $12\frac{1}{2}$ feet high, and is adorned with a centre piece, chandelier and a heavy cornice. Two large double windows open upon the street, and two single windows at the side. The bath-room is finished in black walnut, and furnished with all the modern improvements. The towers are handsome structures, crowned with rectangular shaped domes, presenting convex surfaces.

With this resume the Auditor presents the details of the expenditures and receipts, concerning the debt of the city, and all matters connected therewith; also statistical information relating to the city, appropriately arranged.

Respectfully submitted.

Auditor of Accounts.

APPROPRIATIONS AND PAYMENTS.

CITY AND COUNTY.

1869-70.

Statement in brief of the GENERAL and SPECIAL APPROPRIATIONS made by the City Council to meet the Expenditures of the CITY OF BOSTON and the COUNTY OF SUFFOLK, for the financial year which began with the first day of May, 1869, and ended with the last day of April, 1870, with the revenue added to those appropriations as authorized by ordinance, and balances from 1868-69; and the balances of unexpended appropriations of Dorchester by order of the City Council, January 14, 1870; also of the payments by Drafts made by the Mayor and other authority on the Treasurer against said Appropriations, by which is shown the result of the year, with the balance carried to the Sinking Fund for the redemption of the Debt of the City.

The excess of Expenditures over the Appropriations in some cases was met by Transfers from the Reserved Fund and other Appropriations, duly authorized by the City Council, and in other cases by authorized Loans. These transfers are shown by tables on pages 57, 58.

Total amount carried to the Sinking Fund for the redemption of the debt of the City,	\$1,272,139 14

The above amount, \$1,272,139.14, resulting from the actual business of the year, belongs to the Sinking Fund or *Committee on the Reduction of the City Debt*, and is placed at their disposal, in conformity with the requirements of the ninth and tenth sections of the Ordinance on Finance, Ordinances of 1869, page 217.

This Ordinance requires that any excess of Income over the original *estimated* Income, or any excess of appropriations (original or subsequent), over the actual payments, should be carried to the credit of the Committee on the Reduction of the City Debt, and be applied towards the extinction of the Debt, *and to no other purpose whatever*.

By the same Ordinance it is provided, that no money can be drawn for by the Mayor, or be paid by the *Treasurer*, unless the same has been previously appropriated by a special vote of the City Council; hence the necessity of applying to the Council for additional means, if from any cause an *Original Appropriation* falls short. The additional means thus asked for can only be furnished by an *authorized* transfer from some existing appropriation which can spare it, or by a *specific* loan. In this manner the City Council retain a *knowledge and control* of all the expenditures, as none can be made unless an appropriation for the same is expressly authorized by them.

CITY EXPENDITURES.

Statement in detail, under appropriate heads, of the Expenditures made on account of the CITY OF BOSTON, during the financial year 1869-70, by the several Departments, Boards, and Committees of the City Government, including the payments of interest on the debt of the city, and for the redemption of the City Debt. Also, the amount paid the Commonwealth of Massachusetts for the City of Boston's proportion of the State Tax.

The year commencing with the first day of May, 1869, and ending with the last day of April, 1870.

NATIONAL MUSICAL FESTIVAL AND
PEACE JUBILEE.

In the 17th June week of 1869, a National Musical Festival and Peace Jubilee was held in an immense wooden structure called the "Coliseum," erected expressly for the purpose, at the junction of Boylston and Dartmouth streets, seating some 50,000 persons. The chorus and instrumental performers comprised some 15,000 persons. The originator of the idea was P. S. Gilmore. The Festival and Jubilee was attended by the President of the United States, Ulysses S. Grant, and other high and distinguished civil and military officers and representatives of the press from different parts of the Union. To these, the City Council tendered the hospitalities of the City. The President of the United States was received by both State and City Authorities in a manner fitted to his high station. COUNTY STATEMENT.

The preceding County of Suffolk expenses and income show the following result:

The expenditures on account of the County of Suffolk, as per details on page 185,	\$314,840 81
The income on this account from all sources, as per details on page 192,	118,569 90
 <i>Balance against the County,</i>	 \$201,270 91

Which is an increase of the balance against the County of Suffolk from that of last year of \$55,853.69.

Of the \$314,840.81, the City Authorities had cognizance of \$153,589.64, and the balance, \$161,251.17, was paid on requisitions of the Judges of the several Courts, and for Coroners' accounts, approved by the City Auditor, for expenses of inquests and views on bodies "supposed to have come to death by violence." Coroners' views are cases where no inquests are held. The Coroners in such cases receive a fee of \$2 on each body, for examining into the causes of death.

It will be noticed that the expenses of the License Commissioners chosen under the act of the Massachusetts Legislature

ot 1868, regulating the sale of spirituous liquors, are charged to the County of Suffolk, while the Revenue derived from the licenses issued by them, and the percentage on sales of spirituous liquors, was paid into the City Treasury, amounting this year to *net* \$6,594.13, as provided in said act.

THE SINKING FUNDS FOR THE REDUCTION OF THE CITY DEBT.

By the Eighth Section of the Ordinance on Finance (*Ordinances* of 1869, page 217), the Mayor, the President of the Common Council, and the Chairman of the Joint Committee of Finance on the part of the Common Council, are constituted THE COMMITTEE ON THE REDUCTION OF THE CITY DEBT, whose duty it is to cause all money passed to their credit, in the books of the Auditor of Accounts, to be applied to the purchase or payment of the Capital of the Debt of the City, in the manner they may from time to time deem expedient; and it is the duty of the Auditor and of the Treasurer of the city to conform to all orders in writing, in this respect, which shall be made and signed by all the members of said Committee.

The Ninth Section of said Ordinance requires that "all balances of money remaining in the Treasury at the end of any financial year; all receipts in money on account of the sale of real estate of any description, now belonging or which may hereafter belong to the city; all receipts on account of the principal sum of any bond or note, now owned or which may hereafter be owned by the city; all receipts in money on account of assessments for benefit or advantage by reason of laying out, widening, discontinuance, change of grade or other alteration of streets; and also of the Annual City Tax, in every future year, a sum that shall not be less than three per centum of the amount of the principal of the City Debt (and not less than FIFTY THOUSAND DOLLARS in each year), shall be and the same are hereby appropriated to the payment or the purchase of the Capital of the City Debt."

The Tenth Section of the said Ordinance makes it the duty of the Auditor annually to pass to the credit of the Committee on the Reduction of the City Debt all receipts in money, the proceeds of either of the sources before mentioned, and the said amount out of the *Annual Tax*; and provides that the sums so passed to the credit of said Committee shall be drawn from the Treasury of the city, for the payment or the purchase of the Capital of the City Debt, in the manner before mentioned, *and in no other mode, and for no other purpose whatsoever.*

The following statement, on pages 204-205, being the Account with the Committee on the Reduction of the City Debt, will show the condition of the *Sinking Fund* as it stood April 30, 1870, and will also show what

payments have been made on that account during the year, and what amounts have been placed to its credit, in conformity with the provisions of the Ordinance, as before set forth. Total amount of the Sinking Fund, April 30, 1870, \$8,028,800.21 against \$6,389,757.78 April 30, 1869, being an increase of the fund of \$1,689,042.43 over that year.

By and under authority of an order of the City Council approved May 31, 1869, the Committee on Finance consolidated certain Street Improvement Loans into one Loan, and called it "The Consolidated Street Improvement Loan," which was negotiated in London with the Messrs. Baring Bros. & Co. as a Sterling 5 per cent Loan, amounting to £800,000, dated July 1, 1869, payable in 30 years. The loans embraced in the consolidated one are as follows: Fort Hill Improvement, \$1,250,000; Atlantic Avenue, \$1,200,000; Widening Hanover Street (two loans), \$1,100,000; Church Street District, \$775,000; Total, \$4,325,000.

By and under authority of an order of the City Council of the same date it is provided that the income derived from the various improvements embraced in the "Consolidated Street Improvement Loan," should form a special Sinking Fund for the redemption of said Loan, to be invested by the City Treasurer in such manner and in such securities as the Committee on the Reduction of the City Debt for the time being shall from time to time direct.

The income, on account of the special loans, derived in 1869-70, and paid into the "Consolidated Street Improvement Fund," was as follows:

Church Street District,	\$107,885 58
Fort Hill Improvement,	11,799 80
Atlantic Avenue,	4,712 50
Hanover Street,	2,752 54

WATER LOANS.

APRIL 30, 1870.

In addition to the CITY, ROXBURY and DORCHESTER DEBT, as heretofore stated, there exist Loans, made on account of the WATER WORKS, as follows, viz :

On the issue of BOSTON WATER SCRIP, authorized by Legislative Acts of 30th March, 1846, and 1st May, 1849, as follows:

On Bonds of *One Thousand Dollars* each, payable in Boston, financial year 1870-71, to the amount of

\$688,000 00

On *Sterling Bonds*, bearing interest at the rate of $4\frac{1}{2}$ per cent, to the amount of £400,000, in sums of £100, £200 and £500 each, payable in London, in financial year 1872-73, for which we have realized here, including exchange,

Making the total remaining debt on 30th April, 1869, contracted on account of the construction of the Water Works,

\$2,637,711 11

To which is to be added loan of 1860-61, on City Notes, of \$1,000 each, outstanding, bearing interest at 5 per cent, authorized by an order of the City Council of 30th June, 1858, to defray the expense of laying a *New Main* from the Brookline Reservoir to the city, as stated in Report No. 49, page 220, due 1877-78,

\$299,000 00

Also add, issued under said order, and used for city purposes, due financial year 1878-79,*

95,000 00

394,000 00

Carried forward,

\$3,031,711 11

* Of the \$400,000 originally issued, as provided by the order of June 30, 1858, only \$305,000 was used for the purpose; but, July 14, 1860, a loan of \$16,000 was obtained for raising the pipes on Tremont Street; and one of \$6,000, Dec. 8, 1860, for laying a new pipe on Beacon Street. These sums, together with \$74,000 obtained the financial year 1865-66, under loan orders of Dec. 13, 1864, and Sept. 9, 1865, for purchasing land for the Chestnut Hill Reservoir, in the towns of Newton and Brighton, make up the balance of \$95,000 of the loan of June 30, 1858. This issue of City Debt certificates, for actual expenses of construction of

THE PUBLIC INSTITUTIONS.

The cost of carrying on the various institutions under the charge of the "Board of Directors for Public Institutions," for the financial year 1869-70, compared with the previous year, has been as follows, viz :

HOUSE OF CORRECTION. — The number of inmates on the 30th of April, 1870, was 440, viz : 347 males and 93 females, — average for the year, 441 ; previous year, 445. Expenditures — 1869-70, \$74,381.12 ; 1868-9, \$79,920.03. Income — 1869-70, \$81,378.41 ; 1868-9, \$62,952.62. The income of 1869-70 exceeds the expenditures to the amount of \$6,997.29.

HOUSES OF INDUSTRY, REFORMATION, ETC. — The whole number of inmates in these institutions on the 30th of April, 1870, was 951, viz : 596 males, 355 females, — average for the year, 998 ; previous year, 991 ; distributed as follows : Almshouse, 276 ; House of Industry, 440 ; House of Reformation, boys, 245 ; girls, 37 ; total, 282. Total expenditures for these institutions, located at Deer Island, 1869-70, \$113,823.97 ; 1868-9, \$126,878.08. Income — 1869-70, \$24,206.27 ; 1868-9, \$18,697.94. The income of 1869-70 is 21.3 per cent for carrying on the same, including improvements and repairs of the buildings, and making the *net* expenditures, 1869-70, \$89,617.70, against \$108,180.14, 1868-9.

LUNATIC HOSPITAL. — The number of inmates on the 30th of April, 1870, was 211, viz : males, 119 ; females, 92, — average for the year, 205 ; previous year, 187. Expenditures — 1869-70, \$60,185.65 ; 1868-9, \$57,910.84. Income, 1869-70, \$6,402.78 ; 1868-9, \$8,161.06. The income of 1869-70 is 10.6 per cent of the cost of carrying on the establishment, and making the *net* cost of 1869-70, \$53,782.87, against \$49,749.78, 1868-9.

LAMP DEPARTMENT.

The whole cost for lighting the streets of the city, during the financial year 1869-70, was \$291,693.97, against \$271,167.23 the previous year. On the 30th of April, 1870, the city was lighted with 5,044 gas, and 1,311 oil lamps, being an increase of 620 gas, and a decrease of 15 oil lamps as compared with the previous year. The lamps are located as follows:

In City Proper	3,159 gas, and 470 oil.
In South Boston	482 gas, and 381 oil.
In East Boston	374 gas, and 311 oil.
In Boston Highlands	710 gas, and 79 oil.
In Dorchester	319 gas, and 70 oil.

The price paid for gas in the public lamps of the city proper is one cent per hour for four feet of gas. In South and East Boston, and the Boston Highlands, the United States tax is added to this price. The gas lamps are all cleaned, lighted and extinguished by men employed by the city, at the rate of two dollars and a quarter per night for every one hundred lamps.

The gas lamps in Dorchester are in the care of the Dorchester Gas Light Company until July 1, 1870, and they are paid at the rate of sixty-six dollars each per annum, including the gas, lighting and care and repair of the lanterns; the lamps are lighted only about two-thirds as many hours per annum as in other sections of the city. The underground service pipes are laid and kept in repair by the various companies under the direction of the Superintendent of Lamps, and at the expense of the city, without pecuniary consideration or profit to the companies.

The oil lamps, during the past year, have been lighted and cleaned by men employed under the Superintendent of Lamps at the rate of three cents per lamp, per night, for this service.

A contract has been made by the city for the supplying of the oil lamps, to May 1, 1871, with burning fluid, at the rate of one mill per hour for each lamp.

PUBLIC VACCINATION.

The office of the City Physician is in the basement story of the Central Charity Bureau Building, Chardon street, and his office hour is from 12 M. to 1 P. M., daily.

The number of persons vaccinated and re vaccinated, free of expense, during the year ending 30th April, 1868, was 2,460; previous year, 1,470.

The number of children examined and furnished with the certificate of vaccination required to entitle them to enter the public schools was 338; previous year, 401.

The number of gratuitous supplies of vaccine virus to physicians belonging to Boston, has been 155; previous year, 178.

The various city institutions, public hospitals, and other charitable institutions have also been supplied with vaccine virus, at sundry times, as necessity required. In consequence of the liberal supply of virus from this office to physicians and to the United States Army, the number of vaccinations during the year by private physicians must have been very large.

The duty of attending all cases of sickness at the Suffolk County Jail, and at the City Temporary Home, Charity Building, Chardon street, is assigned to the City Physician.

The valuation on the preceding pages excludes all the property owned by the city, which is never estimated by the City Assessors. In the State Valuation, this property is all estimated and taxed.

Real and Personal Property and Income are all taxed at the same rate.

The rate for 1869 was \$13.70 on every thousand dollars.

*The City of Roxbury, with a valuation of \$26,551,700, united with Boston 1867.

The following items are not estimated in the foregoing valuation, viz:

All houses of religious worship, and the pews and furniture of the same. All tombs, and rights of burial.

The personal property of all literary, benevolent, charitable and scientific institutions incorporated by the State; and all the real estate belonging to such institutions, *which is actually occupied by them* or their officers for the purposes for which they were incorporated.

United States Securities and all shares in Massachusetts corporations owned by individuals.

All property belonging to the United States Government.

All property belonging to the Commonwealth, except real estate of which they may be in possession under a mortgage for conditions broken.

The income of all officers holding a commission from the United States Government.

Household furniture of every person, not exceeding \$1,000 in value; and his wearing apparel, and the tools necessary for carrying on his business, under \$300.

The income of all persons to the amount of \$1,000; all income above that amount being taxable.

* The City of Roxbury, with a valuation of \$18,265,400 Real, and \$8,286,300 Personal; Total \$26,551,700, united with Boston 1867: its valuation as a part of Boston taking effect in 1868. The aggregate valuation of Boston and Roxbury in 1867 was \$471,497,800.

† The town of Dorchester, with a valuation of \$12,826,200 Real, and \$7,489,500 Personal; Total \$20,315,700, was annexed this year. Its valuation will form a part of the total valuation of Boston in 1870. The united valuation of the two municipalities for 1869 was \$569,827,300.

It will be observed that for the years preceding 1863, different parts of the city were assessed at different rates; this practice still prevails in other cities of the State of New York.

PHILADELPHIA.

The following partial table, compiled in part from official documents, exhibits the assessed valuation for seven years in the City of Philadelphia:

In the assessment of 1868 a system of taxation, different from that heretofore existing, was adopted in this City. An increase of 175 per cent on the valuation of the Real Estate as appraised the preceding year, would seem to be the result of an assessment approximating to market value. Several classes of personal property of large amount, (including "moneys at interest," "goods, wares, merchandise and stock in trade,") which under the laws of Massachusetts are included in the valuation of the cities and towns of the Commonwealth, are under the laws of Pennsylvania assessed exclusively for the benefit of the State. An enactment of the legislature * of 1868, first taking effect in the levy of 1869, requires a discrimination in the assessment of taxes upon Real Estate. The suburban portion of this municipality is assessed upon two-thirds and the farming land upon one-half of the rate levied upon the built-up portion

* The text of the law will be found in full in the report of 1868-69.

Under the laws of Ohio, real estate has heretofore been valued for the purpose of taxation, once in ten years; the last valuation taking effect in 1860. The gain of eight millions upon this class of property during the eight years that have elapsed since that date, represents the improvement in old, and the value of new buildings. Under this system it would seem that great inequality must exist. Wards, or districts, where property has not materially advanced since the valuation, and where, consequently, assessments would be most oppressive, must bear a much greater burden of taxation than Districts where values

have largely increased. Personal estate, which is assessed upon a system very similar to that of Massachusetts, and which the citizens are compelled, under a heavy penalty (fifty per cent added to estimated value) to list under oath; and which is assessed at the same rate per cent as real property, must bear a tax much out of proportion to that levied upon the real estate of a rapidly increasing locality. The preceding table demonstrates that the assessed value of personal estate has been increased 96.50 per cent in eight years, while in the same time the assessment of real estate has advanced but 13.27 per cent. It was probably with a view to mitigate the effect of such inequalities, without radically changing their system of taxation, that the legislature enacted in 1867, that the valuation of 1870 should be for a term of five years only. The above comments were published in the report of 1869, and were forwarded to Cincinnati with the request for the valuations of that year. W. B. Folger, Esq., assistant auditor, forwarded with the returns the statement "that the above remarks will apply equally well to the valuation of 1869. Our new revaluation will be made the latter part of 1870, and the levy for 1871 will be made upon it."

See Property in charge of Board of Directors for Public Institutions.

WATER WORKS.

LAKE COCHITUATE.—Situated within the limits of the towns of Framingham, Wayland and Natick, in Middlesex County. The extreme length of the lake in a direct line is $3\frac{1}{2}$ miles, and the breadth of the widest part about 1,800 feet, with a water surface of 650 acres. In addition to the supply in the Lake, "Dug Pond," containing $44\frac{1}{2}$ acres, and "Dudley Pond," containing 81 acres, are connected with and form important tributaries to the Lake. Also, around Lake Cochituate four acres, and around Dug Pond eleven.

Also, the whole line of the Water Works extending from the Lake, and continuing through a brick aqueduct, iron pipes and stone tunnel of $11\frac{1}{2}$ miles, to a reservoir in Brookline, of about 23 acres of water surface; and from thence through about 170 miles of iron pipe to and through the city, to other reservoirs in city proper, South and East Boston and the Highlands.

Also the "Chestnut Hill Reservoir," now being constructed on land purchased for that purpose in the towns of Brighton and Newton, to be of the capacity of 730,000,000 gallons, and a surface of $212\frac{3}{4}$ acres.

Pipe Yard and Wharf, Albany street, containing 72,617 feet, upon which there are wooden buildings for storage of pipes, etc.

Pipe Yard and Machine Shop, on Federal street near Summer, with tools and machinery, and other property therein, for the use of

the department. This lot contains 9,192 feet, on which is a brick building used as a machine shop. The original cost of the establishment, including tools and machinery, stable, etc., was about \$30,000.

Building on Elmwood street and place, on a lot of 5,563 square feet, in which are the pumping engines for supplying water to the highest parts of Boston Highlands, by means of the standpipe erected on Highland Park, formerly known as the "Fort Lot," between Beach Glen and Fort avenue. This lot was placed in charge of the Cochituate Water Board by an order of the City Council of last year. It contains 115,000 feet.

The report of the Cochituate Water Board to the City Council, for the financial year 1869-70, contains an account of the water pipes and other stock on hand at that date. Also a full statement of the condition of the works.

The net cost of these works to the city up to the 30th of April, 1870, is \$9,765,959.87 — as per statement on page 233.

CITY PHYSICIAN'S OFFICE, Central Charity Bureau Building.—The following property is in charge of the physician, viz: Seventeen volumes of medical books relating to the business of the department; various other books; one case of instruments, and sundry other instruments.

PAVING DEPARTMENT.

The following property is under the charge of the Superintendent of Streets:

BUILDING AND WHARF, on Albany street, opposite Sharon street, adjoining the City stable. The building is of brick and wood, and covers some 8,000 square feet of land, and is divided into a shed for breaking stone for macadamizing, blacksmith and carpenters' shops, and a tool-room. The total contents of the lot, including wharf and building, is 55,292 square feet. Original cost of building, \$10,940.86.

CHARLES STREET WHARF, opposite the Jail, containing about 28,000 square feet; used for landing and storing of materials for the department.

LEDGE Lot, on Shawmut avenue, containing 134,671 square feet. Upon this lot are buildings containing a steam engine and stone cracker. Also, a stone powder house, and a small wooden cottage, — the latter occupied by the foreman of the ledge.

On the old ALMSHOUSE lot, Highland street, there is a stable, a portion of which is used by this department, as is also a part of the adjoining lot.

The Superintendent of Streets, in his Annual Report to the City Council, January, 1870, gives a schedule of property belonging to the Paving Department, consisting of twenty-four horses, pair of oxen, etc.

SEWER DEPARTMENT.

The Superintendent of Sewers has under his charge 105 miles of sewers built by the city and under its exclusive control. The Department occupies a small lot on North Grove street, and a larger one with water front, on Albany street, for the storage of materials, tools, etc. In his Annual Report to the City Council, January, 1870, the Superintendent of Sewers gives a schedule of the tools and other property belonging to this department.

PUBLIC BATH HOUSES.

TRUST FUNDS.

OVERSEERS OF THE POOR'S FUNDS.

Trust Funds in the hands of the Overseers of the Poor. F. W. LINCOLN, JR., *Chairman*; OTIS NORCROSS, *Treasurer*, April 30, 1870.

PEMBERTON FUND. — This Fund comprises bequests made to the City of Boston, from 1760 to the present time, from "A. B." Daniel Oliver, Margaret Blackader, Alice Quick, Anne Wheelwright, Mary Ireland, Benjamin Pemberton, Martha Stevens, Mrs. H. Driscoll, William Breed, Samuel Elliot, John Coffin Jones, Mary Belknap. The most important, however, of the bequests was from BENJAMIN PEMBERTON, Esq., whose will was proved June 25, 1782; and for that reason his name has been given to the fund. The income of this fund is to be expended, at the discretion of the Overseers, in semi-annual payments to the poor of this city. The amount of this fund, April 30, 1870, \$93,444.76.

BOYLSTON FUNDS. — These funds were from a bequest by JOHN BOYLSTON, who died in London. His will was proved June 12, 1795. One portion of the bequest is ordered to be paid to "Poor and decayed householders of the Town of Boston" "not under fifty years of age," "persons of good character, and reduced by the Acts of Providence, not by indolence, extravagance or other vice." The other portion to be applied to the "nurture and instruction of Poor Orphans and Deserted Children of the Town of Boston until fourteen years of age."

The Boylston Relief Fund amounted, April 30, 1870, to \$18,446.42. The Boylston Educational Fund amt'd, April 30, 1870, to \$66,484.49.

MASON FUND. — Was a bequest from JONATHAN MASON, by will dated July 15, 1798. Interest to be paid annually to the Chaplain of the Almshouse or Workhouse. Interest to be added until one is appointed. The interest is now paid annually towards the sal

ary of the Chaplain of House of Industry. Amount of Mason Fund, April 30, 1870, \$8,009.80.

DEXTER FUND. — Was a bequest of SAMUEL DEXTER, by will dated May 7, 1811, for supplying firewood or coal to such objects of charity as are not supported in the Almshouse, though sometimes relieved by the Overseers of the Poor. Amount of Dexter Fund April 30, 1870, \$1,776.01.

JEFFRIES FUND. — Was a bequest by DAVID JEFFRIES, former Town Treasurer. Will dated January, 1786. Income to be applied to the purchase of tea, coffee, chocolate and sugar for the refreshment of those persons who, in the Providence of God, are or shall be obliged to seek refuge in the Almshouse after having lived reputably, but always giving preference to the pious poor. Amount of Jeffries Fund, April 30, 1870, \$1,561.31.

FRANKLIN FUND.

This is a fund for the encouragement of young mechanics. Dr. BENJAMIN FRANKLIN, in his will, gave the inhabitants of Boston, in 1791, one thousand pounds sterling, which he directed to be loaned

in sums of not more than £60 nor less than £15, to one applicant, at 5 per cent interest; to be repaid in annual instalments of 10 per cent each. These loans are restricted to "Young Married Artificers, under the age of twenty-five, who have faithfully served an apprenticeship in Boston, so as to obtain a certificate of good moral character from at least two respectable citizens, who are willing to become their sureties in a bond for the repayment of the money."

The Doctor calculated (not anticipating any losses) that the one thousand pounds would increase in the course of one hundred years, to one hundred and thirty-one thousand pounds (\$582,000); and of this amount he would have the managers lay out £100,000 in public works; and the remaining £31,000 he would have continue on interest for another term of one hundred years, at the end of which time he calculated that the fund would be £4,610,000; of which, £1,610,000 was to be at the disposition of the inhabitants of the Town of Boston, and the balance to the Government of the State.

The Trustees under the Will are the Selectmen (now Board of Aldermen), united with the ministers of the oldest Episcopalian, Congregational, and Presbyterian Churches in the Town of Boston. The first loan was made in May, 1791.

The Treasurer of the Fund, FREDERIC U. TRACY, in his annual report to the trustees, makes the statement of its condition, Jan. 1, 1870, viz:

Amount of the Fund, Jan. 1, 1869,	\$133,493 36
Interest accrued during the year,	<u>8,575 54</u>
Amount of Fund, Jan. 1, 1870,	<u><u>\$142,068 90</u></u>

STOUGHTON SCHOOL FUND.

This is a bequest of Governor WILLIAM STOUGHTON, who died at Dorchester, July 7, 1701, and the following extract from his will furnishes the purposes for which it was made. "Unto the Schools of Dorchester I give the sum of one hundred and fifty pounds to be secured and settled under improvement for a yearly income towards the advancement of the salary of the schoolmaster, wherein my will is, that if within the space of ten years next following the date of this my last will, the town of Dorchester shall not have provided and settled such a salary of their own proper gift as shall make up the present salary, already settled to be and continued to the full value of £40 a year; in that case, I say my will is, that, until they shall have provided and settled a salary of that value of £40 a year, the whole improvement of this my gift shall yearly be paid to the steward of Harvard College in Cambridge, and at the discretion of the President and Fellows thereof, be given toward the encouragement of some well deserving student there coming from or be-

longing to the town of Milton, if any such there be, otherwise to some other that may deserve it."

The terms of this bequest were complied with by the authorities of the town of Dorchester. This fund was received from the Treasurer of the town of Dorchester by the terms of the Act of Annexation of said town to Boston, and stands as follows:

16 shares State National Bank,	\$1,600 00

GIBSON SCHOOL FUND.

This is a bequest of CHRISTOPHER GIBSON for school purposes. He applied for freemanship in the town of Dorchester, October, 1630, and was an inhabitant of that town as late as 1646, but removed to Boston previous to 1650, in which year he assisted in forming the Old North Society. He provided by will, about 1674, "that if anything of his estate should remain undisposed of after the payment of his legacies therein bequeathed and of his just debts, such remainder of his estate should be left to the discretion of his executors to purchase some estate for the promoting of learning in the town of Dorchester." There remained in the hands of the executors, after complying with the terms of the will, £104, with which sum, the surviving executor, Daniel Preston, purchased twenty-six acres of land at Smelt Brook, and deeded the same, on the sixth day of February, 1693, "to Enoch Wiswell, Samuel Robinson, John Tolman, James Bird and Increase Sumner as Trustees aforesaid for the time being, and to their successors and assigns for ever in the same place, trust and office, to and for the only sole use and purpose, benefit and behoof of the schools of learning in the town of Dorchester, and to and for no other use, intent or purpose whatsoever, absolutely without any manner of condition, redemption or revocation in any wise." Sales of this land have been made from time to time and the part still held consists of 622,671 square feet.

This fund was received from the Treasurer of the town of Dorchester, and stands as follows, viz :

To this fund also belong a United States Six per cent Registered Bond for \$5,000, and three coupon Bonds of \$1,000 each, — total \$8,000, which were stolen from the vault of the Dorchester Mutual Fire Insurance Co., November 4, 1869, in which they were deposited by the Treasurer of the town, and the loss was assumed by the town of Dorchester, as will appear from the following copy of a certificate of the selectmen of the town.

DORCHESTER, Nov. 17th, 1869.

To whom it may concern :

We, the undersigned, Selectmen of the town of Dorchester, by virtue of the authority conferred upon us by vote of the town, passed in April, 1869, hereby certify that certain funds of the town of Dorchester, were by our advice, for safe-keeping, deposited by Thos. F. Temple, Treasurer, in the Dorchester Mutual Fire Insurance Co.'s vault in Wood's block, Neponset; that on the night of November 4th, 1869, said vault was rifled of its contents by burglars, who forced the same and carried away sundry property there deposited for safe keeping, among which was one United States Registered Bond for \$5,000 and three \$1,000 Bonds (sixes 1881 coupons) belonging to the town of Dorchester, and being a portion of the Gibson School Fund; that all due steps have been taken to recover the same, but to this time have been unsuccessful, and we hereby state and say: First, that Thos. F. Temple we do not hold responsible for said bonds, and that as the agents of the town of Dorchester, we declare we are satisfied that he used due care in the custody of said bonds; and, second, that the loss of them shall be the loss of the town of Dorchester, and not the loss of said Thos. F. Temple.

by (signed)	TOWN OF DORCHESTER, JAMES H. UPHAM, } Its Agents WILLIAM POPE, } and W. HENRY SWAN, } Attorneys.
-------------	---

The Registered bond of \$5,000 will be replaced by a re-issue of a new certificate by the United States, and the amount of \$3,000, the value of the coupon bonds, will undoubtedly be replaced in this Fund by a vote of the City Council.

PUBLIC LIBRARY FUNDS.

BIGELOW FUND. — This is a donation made by Hon. JOHN P. BIGELOW, in August, 1850, when Mayor of the city.

The income from this fund is to be appropriated to the purchase of books for the increase of the Library.

One certificate of City of Boston Six per cent Stock, for \$1,000.00.

Payable to the Chairman of the Committee on the Public Library for the time being.

BATES FUND. — This is a donation made by JOSHUA BATES, Esq., of London, in March, 1853.

One certificate of City of Boston Six per cent Stock, for \$50,000.00.

“The income only on this fund is to be, each and every year, expended in the purchase of such books of permanent value and authority as may be found most needful and most useful.” Payable to the Mayor of the city for the time being.

PHILLIPS FUND. — This is a donation made by the Hon. JONATHAN PHILLIPS, of Boston, in April, 1853.

One certificate of City of Boston Six per cent Stock, for \$10,000.00.

The interest on this fund is to be used exclusively for the purchase of books for the said library.

Also a bequest by the same gentleman, in his will, dated 28th September, 1849.

One certificate of City of Boston Six per cent Stock, for \$20,000.00.

The interest on which is to be annually devoted to the maintenance of a free Public Library.

Both of these items are payable to the Mayor of the city for the time being.

Mr. Phillips died on the 29th July, 1860, at the age of 82, and this latter sum was realized by the city in April, 1861.

LAWRENCE FUND. — This is a bequest by the late Hon. ABBOTT LAWRENCE, of Boston.

One certificate of City of Boston Six per cent Stock, for \$10,000.00.

The interest on this fund is to be exclusively appropriated for the purchase of books for the said library, having a permanent value.

Payable to the Mayor of the city for the time being.

TOWNSEND FUND. — This is a donation from William Minot, and William Minot, jr., Esqrs., executors of the will of Miss Mary P. Townsend, of Boston, at whose disposal she left a certain portion of her estate, in trust, for such charitable and public institutions as they might think meritorious. Said executors accordingly selected the Public Library of the city of Boston, as one of such institutions, and attached the following conditions to the legacy : "The income only shall in each and every year be expended in the purchase of books for the use of the library ; each of which books shall have been published in some one edition at least five years at the time it may be so purchased."

One certificate of City of Boston Six per cent Stock, for \$4,000.00.

FRANKLIN CLUB FUND.

One certificate of City of Boston Six per cent Stock, for \$1,000.00.

This is a donation made in June, 1863, by a literary association of young men in Boston, who, at the dissolution of the Association, authorized its Trustees, Thomas Minns, John J. French, and J. Franklin Reed, to dispose of the fund on hand in such manner as to them should seem judicious. They elected to bestow it on the Public Library, attaching to it the following conditions : "In trust, that the income, but the income only, shall, year by year, be expended in the purchase of books of permanent value for the use of the free Public Library of the city, and, as far as practicable, of such a character as to be of special interest to young men." The Trustees expressed a preference for books relative to Government and Political Economy.

Beside the above, the following donations have been made to the Public Library, and the amounts have been appropriated to the purchase of books, according to the intention of the donors, viz :

CITY HOSPITAL FUNDS.

GOODNOW FUND.—ELISHA GOODNOW, of South Boston (Ward XII.), who died in the year 1851, and whose will is dated 12th July, 1849, bequeathed to the city "all the rest and residue of his estate, real and personal, not otherwise disposed of," for the purpose of establishing, in the Eleventh or Twelfth Wards of the city,

a Hospital for the Sick. One-half of said funds to be applied for the establishment and maintenance of free beds, which should always be at the disposal and under the control of the officers of the Government of said Hospital for the time being. Under this will, the city came into possession of certain real estate situated on Cross street, which has been disposed of, and has produced the sum of \$16,500, which has been invested in City of Boston Six per cent Stock. Also a lot of land on Third street, South Boston, containing 6,68 $\frac{1}{4}$ feet, which was disposed of in 1867 for \$4,633.25, of which \$4,000 has been invested in City of Boston Six per cent Stock, and the balance (\$633.25) remains in the City Treasury.

NICHOLS FUND. — **LAWRENCE NICHOLS**, who died in September, 1862, made the following bequest to the city: "I give to the City of Boston, towards the establishment and endowment of a City Hospital, in case such Hospital shall have been established at the time of my decease, the sum of one thousand dollars." And in case such Hospital should not have been established by the city at the time of his decease, he directed the same amount to be deposited with the Massachusetts Hospital Life Insurance Company, and suffered to accumulate by the addition of interest, until such an Hospital should be established.

The executor of the will, Wm. Perkins, Esq., has paid into the treasury nine hundred and thirty-seven dollars and twenty-five cents (\$937.25), being the amount devised less the *Internal Revenue Tax* on the same, and \$530.50 as one of the "*residuary legatees in the United States*," from the surplus remaining undisposed of. The \$937.25, with the accumulated interest thereon, has been invested in a certificate of City Stock for \$1,000. The balance (\$530.50) remains in the hands of the City Treasurer.

NORCROSS FUND. — Donation of Hon. Otis Norcross, the interest of which is to furnish clothing to indigent patients when leaving the Hospital.

One certificate of City of Boston Six per cent Stock, \$2,000.00

BALL FUND. — Bequest of the late **JONAS BALL**, the interest of

which is to furnish clothing to indigent patients when leaving the Hospital.

The ordinance in relation to the City Hospital, Ordinances of 1869, Sec. 9, page 362, provides that said script shall be deposited with the Auditor of Accounts, who shall receive the interest as the same shall become due thereon, and add it to the moneys which shall have been appropriated for the use of the Hospital.

HAWES FUND.

Being a property left by JOHN HAWES, Esq., of South Boston, who died in 1829. By his will, made in 1813, he directed that the income of a portion of his real estate should be applied to certain benevolent purposes, among which were the endowment of places for religious worship, and the establishing and supporting of Public Schools in Ward 12, *South Boston*, in such a way and manner as, in the opinion of certain Trustees, should most tend to the benefit and advantage of the inhabitants of said Ward.

The income is derived from one-half of the rents of certain real estate, situated in South Boston, and on the Neck, near the Roxbury line, Ward 11, in the city proper.

No report is required to be made to the City Government by the Trustees of this fund.

BIRD FUND.

This is a property left by the late JOHN H. BIRD, Esq., of South Boston, who died in June, 1835. It consisted of one-half of his real and personal estate, which was placed in the hands of trustees.

By the terms of the Will, which is dated January, 1835, *the net income* of this property is to be applied, after the death of his mother, to the "support of a seminary of the first order for the education of females, to be established and located in South Boston, Ward 12."

No report is required to be made by the Trustees of this Fund to the City Council.

APPROPRIATIONS

FOR THE FINANCIAL YEAR 1870-71,

And an Estimate of the Ways and Means of Meeting the same.

By the fifteenth section of the Ordinance on Finance, the Auditor of Accounts is required to lay before the City Council, in the month of February, annually, an estimate of the amount of money necessary to be raised for the expenditure of the then ensuing financial year, under the respective heads of Appropriation ; together with an estimate of the Ways and Means of paying the same.

Such estimates were duly made, and laid before the Council in February last ; they were referred to a special Committee, by whom an order was reported which finally passed the City Council.

That order was in substance as follows :

It is hereby ordered by the City Council, That to defray the expenditures of the City of Boston and the County of Suffolk, for the financial year commencing with the first day of May, 1870, and ending with the last day of April, 1871, the following sums of money be, and the same are hereby, respectively appropriated for the objects and purposes as explained in the Auditor's Estimate and in the applications of the various Committees and Boards.

And it is further ordered, That no money shall be expended, and no debt be incurred, for any object or purpose, for which a specific appropriation is herein made, beyond the amount which is so specifically appropriated ; Provided, however, that any sums of money which may be subscribed or contributed by individuals, to promote the object of any of the foregoing appropriations, and which form no part of the estimated income of the city, shall be strictly applied,

according to the intention of the contributors, and shall be credited to said appropriation accordingly; that is to say: For

Boston, April 30, 1870.

ERRORS EXCERED.

FRED. U. TRACY,

City and County Treasurer,

CITY OF BOSTON.

In Board of Aldermen, May 26, 1870.

The Joint Standing Committee on the Treasury, to whom were referred the Accounts of the City and County Treasurer for the year ending April 30, 1870, beg leave to

R E P O R T

That they have made a careful examination of the accounts, and compared them with the records in the Treasurer's office; and they find that the entries correspond with the receipts and vouchers on file.

The business of the office, during the past year, has amounted to	\$17,746,051 23
On City Account	17,431,210 47
On County Account.....	314,840 81
Being an increase over the previous year of.....	1,665,375 53
The balance of cash on hand was	1,229,727 19
The amount of bonds and notes held by the city was	822,154 15
The amount of bonds for sales of lands purchased for the widening of streets was	237,726 47

During the absence of the Treasurer in Europe, a certain sum in gold and bank bills was stolen from the office; and after every effort had been made to recover the amount taken, there still remained a deficit of seventeen hundred and forty-six dollars in gold, which was made up by the Treasurer from his personal funds. The system upon which the business of the office is conducted would have made it impossible for this embezzlement to occur, had it not been for the absence of the Treasurer; and it should be remembered that his absence was caused by city business, and was under the direction of the Committee on Finance of last year.

Respectfully submitted, for the Committee.

ROBERT COWDIN,
Chairman.

In Board of Aldermen, May 26, 1870.

Read and accepted.
Sent down for concurrence.

NEWTON TALBOT,
Chairman.

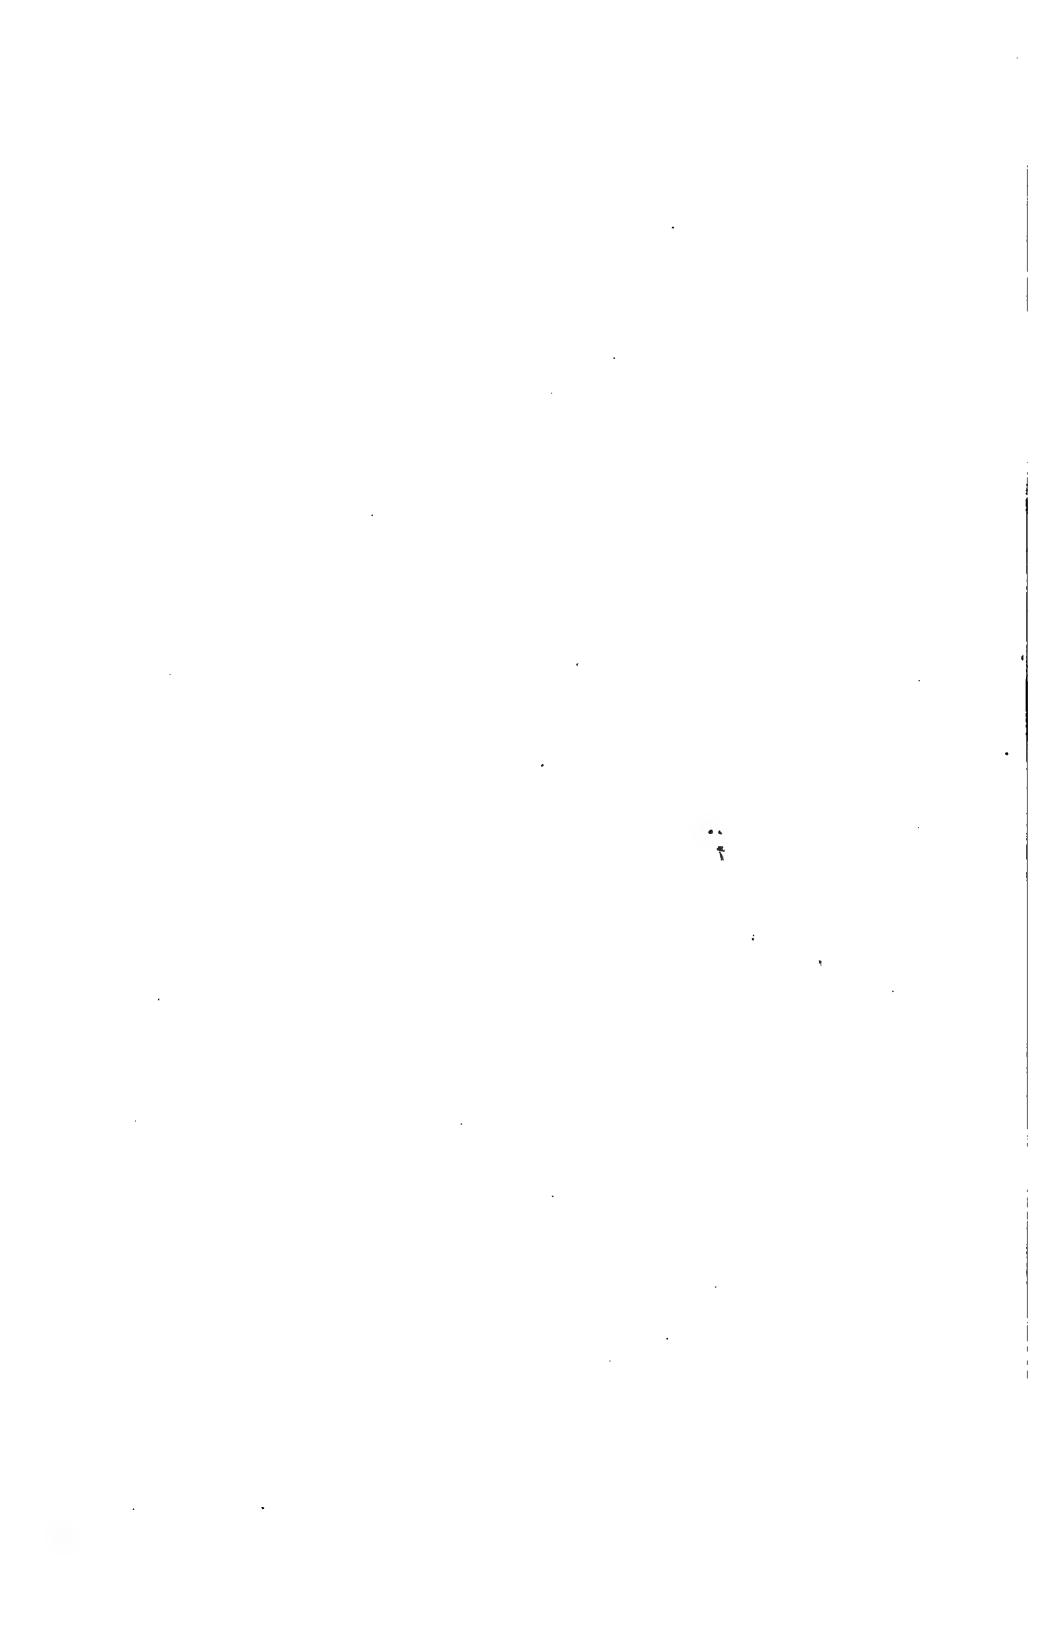

In Common Council, May 26, 1870.

Concurred.

M. P. GREGG,
Clerk of the Common Council.

Attest.

S. F. McCLEARY,
City Clerk.
